

ISRAEL ADIGUN

adigun.jolly@gmail.com | [Github](#) | [Portfolio](#) | (414)275-4042

Recent Computer Science graduate with hands-on full-stack experience building scalable web applications using Django, React, and AWS. Proven at writing clean, efficient code and delivering under tight deadlines—led a team to ship an account management platform with secure auth and real-time features. Seeking backend or full-stack roles where I can drive performance and grow with a high-velocity team.

EDUCATION

Jan 2023 - May 2025

Bachelor of Science in Computer Science
University of Wisconsin

PROJECT EXPERIENCE

Account Management Web App – Lead Full-Stack Developer

September 2024 - March 2025

- Led 5-person team to build Django-powered platform for educational organizations—handled user auth, role-based access, and course/section CRUD
- Implemented secure user authentication system role-based access control and designed the database schema enabling users to efficiently manage courses and sections

Real-Time Chat Messaging – Application Developer

January 2024 - May 2026

- Built TypeScript React + Node.js chat app with JWT auth, AWS S3, and WebSockets—scaled to 50+ concurrent users without lag
- Executed full codebase migration to TypeScript, implementing strict type-safety across Redux state and Express middleware to improve system reliability
- Architected scalable media storage using AWS S3 and Multer, featuring real-time image upload preview and secure asset management

WORK EXPERIENCE

Production Associate

July 2025 - February 2026

Boston Scientific, Maple Grove, MN

- Consistently hit 100% daily production targets in a 50-person line while maintaining zero downtime during peak shifts
- Drove process improvements and quality inspections that reduced defects and boosted operational efficiency
- Adapted to 20+ priority shifts weekly while strictly adhering to ISO-13485 standards

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, C, PHP

Backend & Frameworks: Django, Node.js, WebSockets, REST APIs

Frontend: React, HTML/CSS

Databases: MongoDB, SQL (PostgreSQL), AWS

Tools: Git, CI/CD, AWS EC2

Core: Data Structures, Algorithms, System Design, Agile
