

ISRAEL ADIGUN

Austin, TX | (414) 275-4042 | adigun.jolly@gmail.com | github.com/israel1jol | israeladigun.dev

Software engineer building full-stack web applications with TypeScript, React, Node.js, Python, Django, AWS, SQL, and MongoDB. Detail-oriented and analytical, with strong communication across teams.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, Java, C, PHP, SQL
- **Frontend:** React, Redux, HTML, CSS, responsive UI, web development
- **Backend:** Node.js, Express, Django, REST APIs, WebSockets, JWT authentication, RBAC
- **Databases & Cloud:** PostgreSQL, MongoDB, AWS S3, AWS EC2
- **Tools & Practices:** Git, CI/CD, Agile, AI-assisted development (Anthropic API integration)

WORK EXPERIENCE

Software Contributor | Postbrief.dev | Austin, TX, Apr 2026 - Jun 2026

- Built the authentication UI in TypeScript and React for a data pipeline and report automation tool, including sign up and sign in flows with an email confirmation step.
- Shipped responsive, mobile-first layouts across the landing page and data tables, debugging and resolving mobile layout shift and light mode contrast issues.

Production Associate | Boston Scientific | Maple Grove, MN, Jul 2025 - Feb 2026

- Met 100% daily production targets in an ISO 13485 regulated environment while adapting to 20+ weekly priority changes without disrupting team output.
- Rectified a device update posting issue in SharePoint, rewriting and standardizing hundreds of device entries to restore data accuracy.

Undergraduate Research Assistant | University of Wisconsin-Milwaukee | Milwaukee, WI, May 2023 - Oct 2023

- Applied semantic segmentation to isolate cellular structures in microscopy datasets, ensuring consistency across biological image analysis workflows.

PROJECT EXPERIENCE

Real-Time Chat, Jan 2024

- Built a TypeScript, React, and Node.js chat application with JWT authentication, WebSockets, Redux state management, and AWS S3 media storage.
- Migrated JavaScript codebase to TypeScript, adding stricter types across frontend state and Express middleware to reduce runtime risk and improve maintainability.
- Implemented real-time image previews and secure uploads using Multer and AWS S3; supported 50+ concurrent users during testing without noticeable lag.

Account Management, Sep 2024

- Led a 5-person team building a Django web application for educational organizations to manage users, courses, sections, and administrative workflows.
- Implemented authentication, role-based access control, and course/section CRUD features; designed relational database schema to keep entities organized and extensible.

EDUCATION

Bachelor of Science in Computer Science | University of Wisconsin-Milwaukee, May 2025
