

ISRAEL ADIGUN

Austin, TX | adigun.jolly@gmail.com | (414) 275-4042 | [GitHub](#) | [Portfolio](#)

Software engineer building full-stack applications with TypeScript, React, C++, Python, Java, Node.js, Django, AWS, SQL and MongoDB.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, Java, C, C++, PHP, SQL
- **Frontend:** React, Redux, HTML, CSS, responsive UI
- **Backend:** Node.js, Express, Django, REST APIs, WebSockets, JWT authentication, RBAC
- **Databases & Cloud:** PostgreSQL, MongoDB, AWS S3, AWS EC2
- **Tools & Practices:** Git, CI/CD, Agile, data structures, algorithms, system design

WORK EXPERIENCE

Software Contributor | Postbrief.dev | Austin, TX

Apr 2026 - Jun 2026

- Built the authentication UI in TypeScript and React for a data pipeline and report automation tool, including sign up and sign in flows with an email confirmation step.
- Shipped responsive, mobile-first layouts across the landing page and data tables, debugging and resolving mobile layout shift and light mode contrast issues.

Production Associate | Boston Scientific | Maple Grove, MN

Jul 2025 - Feb 2026

- Met 100% daily production targets on a 50-person line while maintaining quality inspection standards in a regulated manufacturing environment.
- Followed ISO-13485 processes, documentation expectations, and quality procedures; adapted to 20+ weekly priority changes without disrupting team output.
- Identified process improvement opportunities that helped reduce defects and improve operational efficiency.

Undergraduate Research Assistant | University of Wisconsin-Milwaukee | Milwaukee, WI

May 2023 - Oct 2023

- Applied semantic segmentation techniques to distinguish and isolate cellular structures, contributing to biological image analysis workflows
- Collaborated with research lead to ensure segmentation consistency across microscopy image datasets.

PROJECT EXPERIENCE

Chatlio — Real-Time Chat Application

Jan 2024 – May 2026

- Built TypeScript React and Node.js chat application with JWT authentication, WebSockets, Redux state management, and AWS S3 media storage.
- Migrated JavaScript codebase to TypeScript, adding stricter types across frontend state and Express middleware to reduce runtime risk and improve maintainability.
- Implemented real-time image previews and secure uploads using Multer and AWS S3; supported 50+ concurrent users during testing without noticeable lag.

AwkwardTurtles — Account Management Platform

Sep 2024 – Mar 2025

- Led 5-person team building Django web application for educational organizations to manage users, courses, sections, and administrative workflows.
- Implemented authentication, role-based access control, and course/section CRUD features; designed relational database schema to keep entities organized and extensible.
- Coordinated sprint planning, task breakdown, and team delivery under deadlines while maintaining readable, documented code.

EDUCATION

Bachelor of Science in Computer Science | University of Wisconsin-Milwaukee

May 2025
